

DISASSEMBLY INSTRUCTIONS

If you wish to disassemble the SunnyTent, please follow the steps of the installation instructions in reverse order. Please refer to the installation instructions.

In short:

Step 1: Remove tent pegs from the tent.

Step 2: Lower the tent.

Step 3: Remove the tent poles from the anchors.

Step 4: Place the tent in such a way that the tent poles are straight and remove the poles from the tent / out of the pole seams/tunnels.

Attention: never pull on the poles (or parts thereof), as you might break the elastic cord inside the poles. **Push** the poles out rather than pulling them from the tunnels. How? With 'hand 1' you push the pole set forward (into the tent tunnel) while with 'hand 2' you obstruct only the blue / grey tent tunnel. Thereafter you clamp the whole with 'hand 2' while you pull back the empty blue / grey tent tunnel with 'hand 1'. Repeat this action until the pole set is completely free from the tunnel.' Click [here](#) for the video demonstration

Step 5: Clean the SunnyTent and allow it to dry before folding and storing the tent. Thoroughly clean and dry the poles, anchors and tent pegs as well.
